A survey by the American Automobile Association (AAA) reveals that drivers want to see more effort into improving existing driver support features, rather than automated vehicles (AVs). About 77% of survey respondents favor improving driver support features, compared to 18% who prefer to focus on AV development. Approximately 85% of survey respondents are currently fearful or unsure of AV technology.

Electric vehicle (EV) purchases increase in the U.S. In the first three months of 2022, EV sales increased by 60%, even as new vehicle registrations decreased by 18%. EV registrations are now at a historic 4.6%.

The Federal Communication Commission proposes equipping school buses with Wi-Fi. The proposal is an attempt to bridge the digital divide (i.e., internet access for underserved populations), which has been highlighted during the COVID-19 pandemic. The buses would support students traveling to and from school as well as extracurricular activities.

Cincinnati, Ohio considers banning scooter sharing. City officials recently changed the permissible hours of operation to 6 AM to 6 PM due to challenges, such as underage riders and crime. The city also froze fleet sizes at 400 devices per operator.

Uber shareholders vote against a proposal to disclose lobbying activities. The measure would require Uber to disclose direct and indirect lobbying activities and expenditures. However, 45% of shareholders voted in favor of the measure this year, compared to the 30% who voted in favor last year.
