

# Last Week In Innovative Mobility

July 19 - 25, 2021

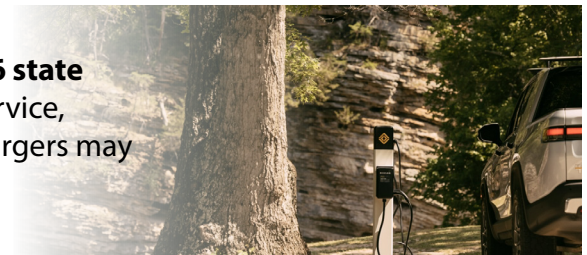

## AUTOMATED VEHICLES

**Ford, Argo AI, and Lyft plan to launch a semi-automated ride service by Winter 2021.** The service uses semi-automated Ford Escape vehicles with a safety driver behind the wheel. The companies plan to launch the service in Miami, Florida this year and Austin, Texas in 2022.

## ELECTRIC VEHICLES

**Rivian plans to install electric vehicle (EV) chargers in Tennessee's 56 state parks.** Rivian is paying for charger design and installation; 10 years of service, maintenance, and upgrades; and any necessary utility upgrades. The chargers may be installed as early as Fall 2021.

## ELECTRIC VEHICLES

**Indiana gives utility companies \$5.5 million to build EV chargers throughout the state.** The money is helping build 60 stations that can charge EVs in about 30 minutes. The funds support EV adoption in Indiana by providing the necessary infrastructure.

## GOODS DELIVERY

**Uber expands grocery delivery to 400 cities.** The new markets include New York City, New York and San Francisco, California. The service is enabled through partnerships with a variety of companies including Albertsons, Safeway, and Carrs.

## SCOOTER SHARING

**Superpedestrian, an electric scooter company, acquires Navmatic, a software company that helps micromobility companies with real-time operations.** The acquisition allows Superpedestrian to use Navmatic's Super Fusion technology. The technology can detect unsafe riding behavior (e.g., riding the wrong way down a one-way street, repeated hard braking) and notify the rider to help correct their behavior.
